The Windows Vista recovery tool is a recovery CD that allows the user to select the recovery options for their Microsoft Windows computer, and choose whether they want to upgrade their system to a newer version, restore their files from a backup or previous installation of Windows, try out other operating systems such as Linux or Apple Mac OS X Tiger, or perform repairs. The recovery tool can be used with all versions of Windows Vista except Starter Edition. Windows Vista does not support USB 2.0 drivers, except for certain Fujitsu cards. It is also possible to restore an image of the boot partition with the use of a second bootable Windows Vista installation disc. The bootable disc can then be used to downgrade or install an older version of Windows.

Microsoft also made it available in the United States on March 30, 2008 with a four-year term.
